Ny-12561

## EXPERIENCE:

I have done my undergrad in mechanical engineering. After that I have worked as a full stack developer under technologies like METEOR.JS(I have used Blaze for frontend), Node Js, MongoDB, MYSQL, PostgreSQL, React, React Native, Blaze, Javascript, CSS3, HTML, J query and Bootstrap.

I have built mobile apps using Cordova platform.

I have built a complete web application using Meteor.Js (A javascript frame work)

The references have been given below for web application and mobile applications:

Web application:

- <http://my-pop.co.uk/>
- <http://www.navietm.com/>

iOS app:

- <https://itunes.apple.com/in/app/mypop/id943510047?mt=8>

Android app:

- <https://play.google.com/store/apps/details?id=com.nvbr22gmailcom.mypopapp>

## COURSE LEARNING OBJECTIVE:

From the course I would like to boost up my skills and knowledge with working on new application which will be a part of the course, additionally I will be working on VUE an front end frame work where I Don't have hands on yet, which will be added as one more feather to my cap.

Also, I can brush up all my Javascript based technologies along with learning a new framework will be an plus point.
